

Testing... Testing...

Why: The pilot will;

1. Test a new lane layout for 2 blocks of 2nd Street.
2. Install a pilot separated bike lane on 2nd Street.
3. Preserve SEPTA bus stops and parking and loading on the west side of 2nd Street.

New Pilot Bike Lane on **2nd Street** from Race to Market Streets!

Where: 2nd Street,
Race-Market
Streets

When: Starting Nov
2022

Who: City Office
of Complete
Streets & Old
City District

OLD
CITY
independent by design

2nd Street Pilot Project

Why is this project here?

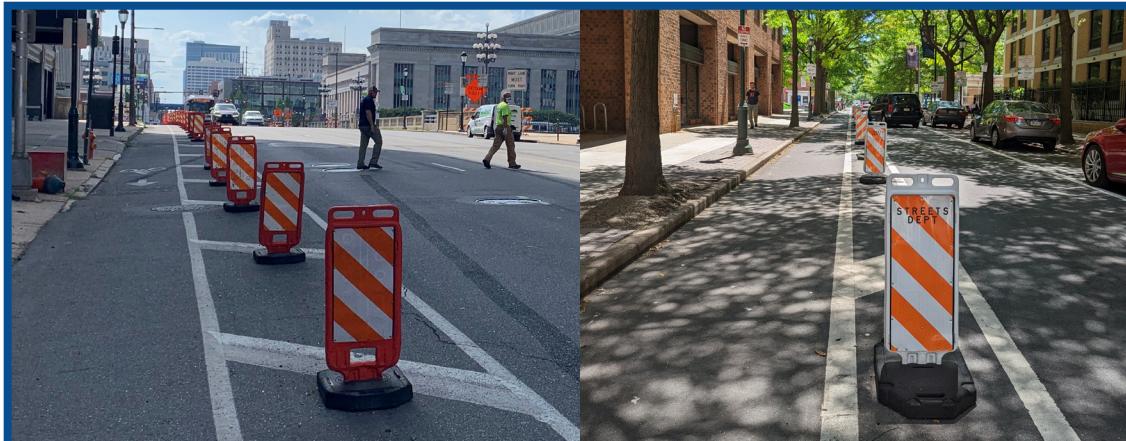

This pilot project is consistent with the Old City District's Vision 2026 Plan, particularly to:

- Improve the connection to nearby neighborhoods
- Encourage car-free travel as a primary mode of transport

During the Vision2026 planning process, within which a community survey gathered hundreds of responses, Old City stakeholders expressed preferences against increased driving. Instead, many expressed enthusiastic support for moving towards walking and cycling as the neighborhood's primary means of transport.

How will it be implemented?

Barriers used in similar projects to delineate temporary lanes.

The pilot project will:

1. Add construction paddles in the east lane of 2nd Street for 2 blocks to test a separated bike lane layout.
2. Compare before and after vehicle and bicycle counts to measure the impact.
3. Ask residents, businesses, and shoppers for feedback on the new layout.
